Sample resume for the AI Mentorship Hub JobFit project. All personal details are made up.

SUMMARY

Aspiring Data Analyst with hands-on experience in Python, SQL, Power BI, Tableau and Excel. Skilled in data cleaning, analysis and visualization, and in turning raw data into clear business insights. Experienced in building interactive dashboards that support decision-making. Strong analytical mindset and problem-solving skills, with a basic understanding of web development. Keen to solve real business problems with data and to keep learning new analytics tools.

SKILLS

Technical skills: SQL, MySQL, Python, Power BI, Tableau, Excel, Power Query
Analytical skills: Data Cleaning, Data Visualization, Data Analysis, Dashboard Development, Data Modeling, Data Validation, KPI Analysis, MIS Reporting
Python libraries: Pandas, NumPy, Matplotlib, Scikit-learn
Soft skills: Communication, Problem Solving, Attention to Detail

EXPERIENCE

Data Analyst Intern, BrightPath Analytics (made-up company) Remote | 07/2026 - Present

- Cleaned and analysed datasets using Excel, SQL and Python to improve data quality.
- Built interactive Power BI dashboards and reports for business insights.
- Did exploratory data analysis (EDA) to find trends and patterns.
- Wrote SQL queries to extract, transform and analyse data for reporting.
- Presented findings to the team with clear, actionable recommendations.

Data Analytics Intern, DataNest Labs (made-up company) Remote | 05/2026 - 06/2026

- Worked on analytics projects using Excel, SQL, Python and Power BI.
- Cleaned, analysed and visualised data to produce business insights.
- Built dashboards and reports for data-driven decision-making.

PROJECTS

Hospital Analytics Dashboard Power BI | SQL | Excel | DAX | Power Query

- Built a Power BI dashboard to track patient admissions, discharges, bed occupancy and hospital performance.
- Cleaned and transformed healthcare data using SQL and Power Query for accurate reporting.
- Created DAX measures and KPIs: Total Patients, Average Length of Stay, Bed Occupancy Rate, Readmission Rate.

E-Commerce Sales Dashboard Power BI | SQL | Excel

- Analysed over 50,000 e-commerce transactions to find sales trends, customer behaviour and top products.
- Built a Power BI dashboard with KPIs such as revenue, profit, new customers and cart abandonment rate.
- Wrote SQL queries using JOIN, GROUP BY and window functions for business reporting.
- Automated weekly sales reports with Excel PivotTables, cutting manual work by about 40%.

Energy Demand Forecasting Python | TensorFlow | Power BI | Flask

- Built LSTM models in Python and TensorFlow to forecast electricity demand and renewable energy output.
- Created Power BI dashboards to show energy production, consumption trends and key KPIs.
- Added a simple web page (Flask) to show the model's predictions.

EDUCATION

B.Tech. (Computer Engineering) | 7.1 CGPA Pune | 2022 - 2026

Sunrise Institute of Technology, Pune (made-up college)

Higher Secondary (HSC) | 72% Pune | 2020 - 2022
